

# ULTRABLOX® X-Ray Attenuating Cream

Protect the hands from scatter radiation and reduce dose exposure without the loss of tactile feel. Clinical studies have shown up to 85% dose reduction. The cream can be applied directly to skin or encapsulated between two pair of surgeon's gloves.

- Patented formula.
- Easily incorporates into physician's prep procedure -- a practical and efficient alternative to leaded gloves.
- Contains no lead, lead by-products or other toxic materials. Biocompatible.
- Eliminates the need to inventory multiple sizes of lead gloves.

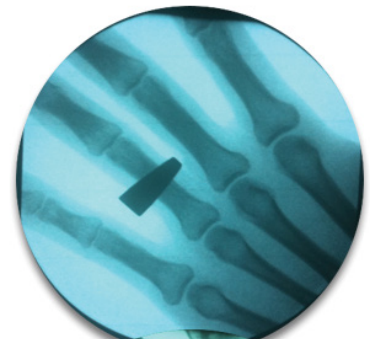

ULTRABLOX® X-Ray  
Attenuating Hand Cream  
50 Gram tube, sterile,  
packaged in a peel pouch
